Key lessons

✔ Building an entire program in parallel creates gaps/slows technology development
✔ Teams need time to form and organize
✔ ESD’s highly qualified and experienced technical team members are a key to successful technology deployment
✔ People need time to familiarize themselves with new technology products in order to successfully design, build, deploy and maintain them
✔ There is a learning curve to transition from Waterfall to Scaled Agile software development
✔ Comprehensive documentation from Vendors is necessary to guide timely deployment of technology products
✔ Strong, collaborative vendor relationships are a critical ingredient to success
✔ Establishing and driving to MVP early results in more rapid development
✔ Adaptive/nimble culture supports change required to improve outcomes
